

**Suppl 2.** Modified MRC-ECOG cytogenetic risk stratification

	<b>Risk group</b>	<b>Cytogenetic abnormalities</b>
MRC-ECOG (Pullarkat et al, 2008)	Very high	t(4;11), complex (>5 abnormalities without translocations), low hypodiploidy (30-39 chr)/near triploidy (60-78 chr)
	High	Other 11q23/MLL, monosomy 7, del(7p), +8, t(1;19) or t(17;19), t(5;14)
	Intermediate	Normal diploid, low hyperdiploidy (47-50 chr), abnormal 11q (not MLL), del 6q, del(17p), del(9p), del(12p), del(13q), t14q32, t(10;14), tetraploidy (>80chr), or any karyotype not identified with a different risk group
	Standard	High hyperdiploidy (> 50 chr)
